

PSY K300, Spring 2017

Statistical Techniques – Syllabus

CLASS TIME AND PLACE

[Lecture Section 7601](#)

Wed and Fri, 9:05 – 9:55 AM, PY 100

LECTURE INSTRUCTOR INFORMATION	LAB INSTRUCTOR INFORMATION
Instructor: Rick Hullinger Office: PY A300B Office Hours: Monday, 1:30 — 4:00 PM Tuesday, 1:30 — 4:00 PM Wednesday 10:30 AM — 12:00 PM Or by appointment Office Telephone: 856-6854 Email Address: rahullin@indiana.edu	Lab Instructors: Edward Koenig (ejkoenig@indiana.edu) Section 29972: M 8:00 – 8:50 AM Section 29971: M 9:05 – 9:55 AM Office Hours: TBA Julie Eyink (jeyink@indiana.edu) Section 29974: T 10:30 – 11:20 AM Section 29973: T 4:00 – 4:50 PM Office Hours: TBA Steven Sherrin (ssherrin@indiana.edu) Section 29975: T 9:30 – 10:20 AM Section 29976: T 11:30 AM – 12:20 PM Office Hours: TBA

COURSE GOALS

Many students think of K300 as a math course. While it is true that we will perform some calculations along the way, this course is not about the math. We would consider this class a failure if what you learned to do was to plug numbers into arbitrary formulas for unknown reasons in order to generate meaningless answers. Instead, we want you to think about the underlying logic and principles of statistical analysis so that you understand *what the numbers tell you (and what they don't tell you)*, not just how to generate them.

This course will explore statistical analysis in a hands-on way. We'll generate and analyze data in a series of lectures and interactive lab exercises. This semester you will tackle the process of statistical inference using a variety of different approaches. Along the way you will gain a grounded understanding of how statistical inference works, and you will learn how to apply statistical techniques to new problems that you encounter after leaving the class. You will become a more savvy consumer of the statistical (mis)information that bombards you every day and a better researcher should you choose to go in that direction.

In this course, successful students will be able to:

- Select and calculate appropriate descriptive statistics and make visual representations of data.
- Demonstrate an understanding of the importance of sampling randomness and measurement noise in statistical inference.
- Understand population parameters and how to estimate them.
- Pick an appropriate statistical technique to test a hypothesis about a particular treatment or experiment.
- Explain and interpret p values with respect to the null and alternative hypotheses.

- Perform a variety of statistical analyses either by hand or with the appropriate software tools.
- Discuss a set of results including p values, confidence intervals, and effect sizes, with respect to real world relevance and suggested next steps.
- Identify and critique examples of good and bad statistical reasoning in the popular press.
- Identify problems with classical statistical techniques and demonstrate an awareness of alternate methodologies including Bayesian ideas

TEXTBOOK & COURSE MATERIALS

We will not be using a textbook for this course. All of the readings and notes that you need will be presented in class and/or provided for you on Canvas.

LECTURE PARTICIPATION

Clickers (Turning Technologies Response Cards) will be used in this class, and you are required to have one. Except for the first week of the semester, there'll be at least one clicker question in each lecture. There will be 28 such lectures, and students must submit responses in at least 20 of those lectures to earn full credit. Your participation in the clicker questions is a key way to improve learning in the large lecture hall, and to provide feedback to the instructor. Students who submit responses in fewer than 20 lectures will have their lecture participation grades reduced. Clickers are used as [formative assessment](#) so there is no penalty for incorrect answers, but students who are routinely answering randomly will not receive participation credit. Clicker misconduct (e.g., responding with someone else's clicker, possessing more than one clicker in class, etc.) will be considered a serious offense, and will result in confiscation of clickers, grade reductions in K300, and other university sanctions. If your clicker malfunctions or you forget your clicker, you are permitted to write your responses on a paper for only one lecture. Regardless of emergency, there will be no excused absences, and if you miss class for any reason it must count toward the eight "dropped" lecture participation marks.

LAB EXERCISES AND FOLLOW-UPS

There will be 12 sets of lab exercises throughout the semester. Work in the labs will be done collaboratively, in groups of 2 – 4 students, but you must submit your own completed lab worksheet, through Canvas, at the end of the lab period. Each lab exercise will also have a follow-up activity for you to complete at home and submit via Canvas. These follow-up exercises must be complete independently to ensure that you understand the concepts covered in the lab. Late labs and follow-up activities will not be accepted. Your lowest lab and lab follow-up scores will be dropped from the final grade calculation.

EXAMS

There will be two exams during the course of the semester. The first portion of each exam will be an in-class exam that will cover your understanding of the conceptual basis of statistics. This portion of each exam will be closed-book, closed-note, and you will not need a formula sheet or calculator. At the lab after each in-class exam, you will be given a take-home exam. The take-home exams will ask you to demonstrate a mastery of the concepts you have learned by analyzing new sets of data and explaining the concepts behind the tools used for analysis. You are free to discuss the content and concepts of the take-home exams with your classmates, but the work you submit must be your own.

Each exam will focus primarily on the new material learned since the previous exam, but questions about older material may be included as well. During finals week (8am, on Wednesday, May 3rd) there will be a cumulative, conceptual final exam similar to the in-class exams taken during the semester.

If you have a scheduling conflict that will interfere with a lab, turning in an assignment, or taking an exam at the scheduled time, you must let me know as soon as possible. With the exception of extreme and unforeseen circumstances, contacting me the day of (or even worse, after) an assignment or exam is due will be considered an unexcused absence and will result in a zero on the late work.

Your final grade is computed using the following formula:

Lecture Participation:	5%
Average of your eleven best lab exercises:	20%
Average of your eleven best follow-up exercises:	20%
Average of your two in-class exams:	20%
Average of your two take-home exams:	20%
Final Exam:	15%
	100%

Grading Scale:

A+: 97.0%-100%;	A: 93.0%-96.99%;	A-: 90.0%-92.99%
B+: 87.0%-89.99%;	B: 83.0%-86.99%;	B-: 80.0%-82.99%
C+: 77.0%-79.99%;	C: 73.0%-76.99%;	C-: 70.0%-72.99%
D+: 67.0%-69.99%;	D: 63.0%-66.99%;	D-: 60.0%-62.99%
F: Below 60%		

STUDENT RESPONSIBILITY

It is your responsibility to double-check your assignment and exam grades – both that the papers themselves were correctly graded and that the scores posted on Canvas match your actual grades. You have two weeks from the time an assignment or exam is returned to the class to address any grading issues. After that, the grades posted on Canvas will be considered final.

EXTRA CREDIT?

Nope.

EMAIL

We expect you to be checking your IU e-mail account no less than once a day. We will send frequent messages to the class with announcements, clarifications, instructions, and/or updates. You are responsible for the content of these messages exactly as if the material had been presented in class. Saying “I didn’t read that e-mail” or “I haven’t checked my e-mail for a few days” will not be considered a valid excuse for missing information. All class-wide messages will be sent using the Canvas Announcement tool, so archived messages can always be found on the Canvas sites.

FEEDBACK

Do not wait until the end of the semester course evaluations to let me know that I could be doing something better. Tell me as soon as possible so that I can make the class valuable and relevant as we go along. If you have any feedback, good or bad, about the course or how it’s being taught, please feel free to send it to me *anonymously* using this link:

<http://www.indiana.edu/~rahteach/feedback.html>

ACADEMIC HONESTY

This course is conducted under the University's Ethics Code. Specifically, it is considered cheating if you obtain any kind of information about answers and solutions to the assignments in this course – exams

and homework – from any non-intended source or conversely transfer such information to others. It is also considered cheating if you lie to me about an absence relating to a homework assignment or an exam. The punishment for academic dishonesty will be no less than a zero on the assignment or exam and will likely be **failure of the course**. As per university policy, *all* incidents of academic misconduct must be reported to the Dean of Students office.

CLASS RECORDINGS

I will be using the Echo360 course capture system record and distribute the K300 class lectures to you through Canvas. Because I will be recording in the classroom, your questions or comments may be recorded. You may watch recordings online, or download them for off-line viewing on your computer, smartphone, or media player. These recordings are copyrighted by me, and provided by me and the University for your personal use. Please see the copyright statement below for the full terms of use. Due to possible unforeseen technical issues, I cannot guarantee that all class sessions will be properly recorded. It is important that you attend class, actively participate, and take notes. If you miss a class session, you cannot assume that a recording will be available.

STATEMENT FOR STUDENTS WITH DISABILITIES

Every attempt will be made to accommodate qualified students with disabilities (e.g. mental health, learning, chronic health, physical, hearing, vision neurological, etc.) You must have established your eligibility for support services through the appropriate office that services students with disabilities. Note that services are confidential, may take time to put into place and are not retroactive; Captions and alternate media for print materials may take three or more weeks to get produced. Please contact Disability Services for Students at <http://disabilityservices.indiana.edu> or 812-855-7578 as soon as possible if accommodations are needed. The office is located on the third floor, west tower, of the Well Library, Room W302. Walk-ins are welcome 8 to 5, Monday to Friday.

COPYRIGHT

Copyright Rick Hullinger and Indiana University, 2017. All federal and state copyrights in these course materials are reserved by their respective creators. You are authorized to take notes in class and/or record my lectures for your own personal use. You are also welcome to share these materials with others. However you may not make any commercial use of my course materials or profit from them in any way without my prior written permission. In addition to legal sanctions for violations of copyright law, students found to have violated these prohibitions may be subject to University disciplinary action under the [Code of Student Conduct](#) and/or violations of the [University's Technology Acceptable Use Policies](#).

DISCLAIMER

This syllabus is an outline of the course and its policies, which may be changed for reasonable purposes during the semester at the instructor's discretion. You will be notified in class and / or via email if any changes are made to this syllabus, and an updated syllabus will be provided on Canvas.

PSY K300, Spring 2017 Statistical Techniques – Schedule

Week		Date	Description
1	Lab		L0: Introduction / Randomness
	W	Jan 11	Thinking about Randomness
	F	Jan 13	Histograms
2	Lab		No Labs, MLK Jr. Day
	W	Jan 18	Summarizing Data / Variability
	F	Jan 20	Models and Simulations
3	Lab		L1: Histograms / Mean, Median, Mode
	W	Jan 25	Evaluating Models
	F	Jan 27	Evaluating Models
4	Lab		L2: Intuitions and Models
	W	Feb 01	The Null Model
	F	Feb 03	Introduction to p Values
5	Lab		L3: Evaluating A Model
	W	Feb 08	Statistical Significance
	F	Feb 10	Statistical Significance
6	Lab		L4: Evaluating the Null using p-values
	W	Feb 15	Exam Review
	F	Feb 17	In-Class Portion of Exam 1
7	Lab		Take Home Exam 1
	W	Feb 22	Experimental Design / Independent Samples
	F	Feb 24	Two Independent Samples
8	Lab		L6: Between-Participants Randomization
	W	Mar 01	Effect Size
	F	Mar 03	Two Related Samples
9	Lab		L7: Within-Participants Randomization
	W	Mar 08	Theoretical Models: t Tests
	F	Mar 10	Intro to SPSS
10	Lab		No Classes, Spring Break
	W	Mar 15	
	F	Mar 17	
11	Lab		L8: SPSS t Tests
	W	Mar 22	Exam Review
	F	Mar 24	In-Class Portion of Exam 2
12	Lab		Take Home Exam 2
	W	Mar 29	Comparing More Than Two Groups
	F	Mar 31	Comparing More Than Two Groups
13	Lab		L9: Between-Participants ANOVA
	W	Apr 05	Correlation
	F	Apr 07	Correlation

Week		Date	Description
14	Lab		L10: Correlation
	W	Apr 12	Theoretical Models: ANOVA and Correlations
	F	Apr 14	The Seamy Underbelly of Statistical Analysis
15	Lab		L11: SPSS ANOVA and Correlations
	W	Apr 19	Meta-Anlysis
	F	Apr 20	Bayesian Approaches
16	Lab		L12: Review
	W	Apr 26	Bayesian Approaches
	F	Apr 28	Final Exam Review
17	W	May 03	Final Exam (8:00 -- 10:00am), PY 100
